

## Your Code

```
1 import java.util.*;
2 class Main{
3     static ArrayList<Patient> list=new ArrayList<>();
4     static HashMap<String,Patient> map=new HashMap<>();
5     static String properCase(String s){
6         String[] words=s.toLowerCase().trim().split("\\s+");
7         String ans="";
8         for(String w:words){
9             ans+=Character.toUpperCase(w.charAt(0))+w.substring(1)+" ";
10        }
11        return ans.trim();
12    }
13    static void registerPatient(Scanner sc){
14        Patient p=new Patient(sc.nextLine(),properCase(sc.nextLine()));
15        list.add(p);
16        map.put(p.id,p);
17        System.out.println("Patient Registered Successfully.");
18    }
19    static void searchPatient(Scanner sc){
20        String id=sc.nextLine();
21        if(map.containsKey(id)){
22            Patient p=map.get(id);
23            System.out.println(p.id+" "+p.name+" "+p.mobile+" "+p.de
24        }
25        else{
26            System.out.println("Patient Not found");
27        }
```

## Input

```
1
P101
Rahul kumar
9876543210
```

## Output

```
Patient Registered Successfully.
```

## Your Code

```
